

Note ...no "s" after the t.

Club Blog (Web-log) Site: <http://miramichinaturalistclub.wordpress.com>

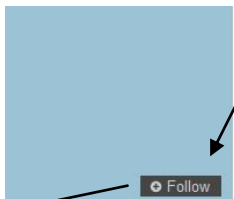

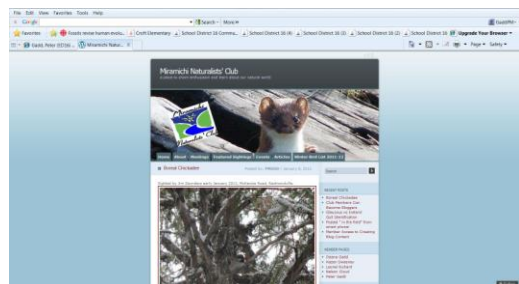

Anyone in the world can visit the site, it is open to the public. To have a more active involvement you can have a "Role" .... Follower, Contributor, Author, Editor. With the blessing of the club exec. you could be an "Administrator" but it is highly recommended there only be one of these.

To receive an email each time something is posted register as a "Follower".

To add a comment to someone's post become a "Contributor". Your post would have to be approved.

To add posts to the first page with images become an "Author". To maintain your own page as well as have all of the above rights, and quite a few others, become an "Editor".

To be a Follower ....

Click "Follow" and enter an email address. You will receive an email to confirm your "subscription to the blog". Accept and you will be notified when ever anything is posted to the blog. (You do need to register for each page you want to follow!)

For any of the other roles send Peter an email ([gadd1313@nb.sympatico.ca](mailto:gadd1313@nb.sympatico.ca)) indicating which role you would like. The roles can very easily be changed later. You will receive an "invitation" which you must accept to activate.

You will also need to register with Wordpress.Com. See attached.

To the best of my knowledge and experience this registration does not result in unwanted emails. Wordpress is a well established and business-like operation. Blogs which are free have a 3 gigabyte storage limit and restricted web page creation flexibility. There is a chance too of ads being included. At this point I think the free service meets our needs. The "full deal" is \$99/a .
