Total Species:	76			

Photo* - these photos not taken the day of the first sighting but mostly within a few days and at the same location. In some cases definitely the same individual.

**In this part of NB the Ring-necked Pheasant isn't considered to be a self-sustaining population so the birds sighted were likely from a nearby game farm.

***In this part of NB the Wild Turkey isn't considered to be a self-sustaining population so the birds sighted were likely from a nearby game farm. The sighting was reported second-hand by a club member who saw photos of the species.
